DETAILED ACTION

Allowable Subject Matter

Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance:

As to independent claim 1 is allowable over the prior art for at least the reason that the prior art of record, taken alone or in combination, fails discloses or render obvious measured method comprising all the specific elements with the specific combination step of contrasting the coordinate values of the X-axis and the Y-axis: repeating step D and E, the CPU reading the values from the linear scales of the X-axis and Y-axis again when the selected standard line flushes with a second side of the contrast image of the workpiece, and contrast the values from the linear scales of the X-axis and Y-axis in step D, wherein the first side and the second side of the contrast are opposite to each other and outputting the measure value: the measure value shown on a display panel and record in the CPU after the CPU contrasting the values from the linear scales of X-axis and Y-axis in step D and F in combination with the rest of the limitation of claim 1.

As to independent claim 3 is allowable over the prior art for at least the reason that the prior art of record, taken alone or in combination, fails discloses or render obvious measured method comprising all the specific elements with the specific combination step of contrasting the rotary value of the selected standard line: repeating step D and E, the CPU reading the rotary value of the selected standard line again when the selected standard line flushes with a second side of the contrast image of the

workpiece, and contrast the rotary value in step D, wherein the first side and the second side of the workpiece form an angle and outputting the measure value: the measure value shown on a display panel and record in the CPU after the CPU contrasting the rotary values in step D and F in combination with the rest of the limitation of claim 3.

As to independent claim 1 is allowable over the prior art for at least the reason that the prior art of record, taken alone or in combination, fails discloses or render obvious a length measure apparatus comprising all the specific elements with the specific combination including of a CPU in received in the base member and electrically connected to the lens set for executing a digital process to the image of the workpiece and forming a contrast image, wherein the CPU having multiple digital standard lines previously set therein, a monitor mounted on the measure apparatus and electrically connected to the CPU, wherein the monitor showing a corresponding one of the multiple standard lines of the CPU and the contrast image of the workpiece, and a rotary controller being provide to circularly the standard lines relative to the contrast image in combination with the rest of the limitation of claim 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
